Projects :

1.Touchless Accessibility System for Differently Abled Users :

Developed a Python-based system that enables touchless control of laptops andmobiles using voice commands, hand gestures, and facial gestures (eyebrow raise/blink). Designed to assist differently-abled users through smart automation and human–computer interaction**.**

Technologies: Python, OpenCV, MediaPipe, VOSK (Speech Recognition), PyAutoGUI.

2. Educare – Career Guidance Platform :

Developed a web-based platform to guide students in choosing the right academic and career paths after 10th or 12th grade. The system provides detailed information about courses, career options, and market demand to help students make informed decisions.

Technologies : HTML, CSS , JAVASCRIPT , REACT J.S , NODE J.S , MONGODB.

DECLARATION

The information provided above is true to the best of my knowledge. I will try my best to do the work assigned to me without any postponed. Hope you will give me a chance to prove myself.
